TECHNICIAN ENGINEER

IN

CIVIL ENGINEERING

June 1992

ACKNOWLEDGEMENTS

I wish to express my appreciation for the valuable assistance rendered to me during the course of the execution of this project to Mrs. D. Serghidou, my project Advisor - Civil Engineering Department.

I also express my appreciations to the architect Mr Z. Zenonos, who gave to me advises and informations for the project. Also to the firms GLAVERBEL GLASS, MUSKITA ALUMINIUM CO LTD, PERMA VENETIAN BLINDS.

Finally I wish to thank Mrs Annita Serghidou for typing this project.

ABSTRACT

This project is composed of three chapters. The first chapter gives information about the function of windows.

In the second chapter all the window types are described. This chapter gives the characteristics of each type like its properties, thickness etc.

Finally the third chapter describes the glass in general, the types of glass, and some of their characteristics like U-value, thickness etc.

The whole work has not as a result to advertise or promote any of the products mentioned. The purpose is to supply information to the reader.

ABSTRACT

1.0	INTRODUCTION	1 - 13
1.1	Function of windows	1
1.1.1	Thermal performance	1
1.1.1.1.	Solar gains and losses	1 - 3
1.1.1.1.a	Venitian blinds	3 - 5
1.1.1.1.b	Shutters	5 - 8
1.1.2	Sound insulation	8 - 9
1.1.3	Ventilation	9 - 10
1.1.4	Lighting	10 - 12
1.1.5	View	13
2.0	WINDOW TYPES	14 - 47
2.1	Wood casement windows	14 - 19
2.1.1	Double-hung sash windows	20 - 28
2.1.2	Inward - opening casements	28
2.1.3	Pivot - hung casements	29 - 30
2.1.4	Horizontal sliding casements	30 - 31
2.1.5	French casements	32
2.1.6	Dummy windows	32 - 36
2.1.7	Sash windows	36
2.1.7.1	General	36
2.1.7.2	Design and construction	37 - 38
2.1.7.3	Inspection and maintenance	39
2.1.7.4	Defects and remedies	40 - 44
