*JUNE 2000*

HIGHER TECHNICAL INSTITUTE	PROJECT NO.  3063
----------------------------------	-------------------------

Povero Catullo, basta con le illusioni :  
se muore, credimi, ogni cosa è perduta.  
I tuoi giorni felici li hai consumati  
quando correvi dove voleva il tuo amore,  
amato come amata non sarà nessuna :  
nascevano allora tutti i giuochi d'amore  
che tu volevi e lei non si negava.  
I tuoi giorni felici ormai consumati.  
Ora non vuole più : e tu non volere, controllati,  
non inseguirla, come un miserabile, se fugge,  
ma non tutta la tua volontà resisti, non cedere.  
Addio, amore mio. Catullo non cede più,  
non verrà a cercarti, non ti vorrà per forza :  
ma tu soffrirai di non essere desiderata.  
Guardati, dunque : cosa può darti la vita?  
Chi ti vorrà? per chi ti farai bella?  
chi amerai? da chi sarai amata?  
E chi bacerai? a chi morderai le labbra?  
Ma tu, Catullo, resisti, non cedere.

*In the memory of my father ...*

*For the love of my mother ...*

LIST OF FIGURES  
LIST OF TABLES  
LIST OF PHOTOGRAPHS

## PART 1

### CHAPTER 1

	<b>Page</b>
Introduction	1
Definition of Wastewater	2
Wastewater Engineering	2
The need for Wastewater Treatment	2 - 3
The cycle of growth and decay	4

### CHAPTER 2 : WASTEWATER CHARACTERISTICS

Introduction	5
Wastewater Composition	5
Physical Water-Quality Parameters	5
Suspended Solids	6
Turbidity	6 - 7
Colour	7 - 8
Taste and Odor	8 - 9
Temperature	9 - 10
Chemical Water-Quality Parameters	10
Total Dissolved Solids	11
Alkalinity	12
Hardness	13
Fluoride	13 - 14
Metals - Nontoxic and Toxic metals	14 - 15
Organics	15
Nutrients - Nitrogen and Phosphorous	16 - 17
Biological Water-Quality Parameters	17
Role of Microorganisms	18
Classification of Microorganisms	18 - 19
Microbes of interest in Water Treatment	20
" "	"

Pathogens	20
Plant organisms	20-21-22
Animal organisms	22 - 23
Pathogen indicator	23 - 24
Water quality Requirements	25
Potable Water Standards	25
Wastewater Effluent Standards	25 - 26
Laboratory Tests	26
Characteristics and Evaluation of Wastewater Quality	26
Dissolved Oxygen	27
ThOD	27
COD	28
BOD	28
TOC	29
S.S and V.S Tests	29
30-minutes Settling Test	29
Nutrients	29 - 30
pH	30
PV	30
Strength of Wastewater	31

### CHAPTER 3 : WASTEWATER TREATMENT

Preliminary } Mechanical Treatment	
Purpose	32
Screening	32-33-34
Grit removal	34-35-36
Comminution	36 - 37
Flow measurement - Equalization	37
Primary } Mechanical Treatment	
Purpose	37 - 38
Primary Sedimentation	38-39-40
Secondary - Biologically Treatment	40 - 41
Tertiary Treatment	
Purpose	41 - 42
Nutrients removal	42-43-44
Solids removal	44-45-46
Advanced Treatment	46

### CHAPTER 4 : MAJOR METHODS OF SECONDARY TREATMENT

Introduction	47
Fundamentals of Biological Wastewater Treatment	47-48-49
Trickling Filters	50-51-52
Rotating Biological Contractors	53-54
Bio Towers	54
Stabilazation Ponds	54 to 59
Activated Sludge	60
Grease Trap	60 - 61

Balancing Tank	61-62-63
Selector Tank	63
Aeration Basin	63-64-65
Factors Affecting Operation	65-66
Final Clarifier	67
Excess Sludge Holding Tank	67
Chlorination Tank	68
Double Filtration	68

### CHAPTER 5 : PRINCIPLES OF WASTEWATER TREATMENT

Basic design factors	69
Basic design considerations for Wastewater treatment works	70-71-72
Performance criteria for treatment plants	72-73
Effluent Standards	74
Sitting of treatment works	74 - 75

### CHAPTER 6: TREATED WASTEWATER AND IT'S USE

Summary	76
Backround	76-77-78
Problems associated with the reuse of Treated Effluent for Irrigation	79
Quality criteria for Effluent Reuse	79 - 80
Present Situation in Cyprus	80 - 81
Conclusions	81

## PART 2

### CASE STUDY - APLIKI AREA

#### CHAPTER 1 : CASE STUDY

Location and objectives of plant	83
----------------------------------	----

#### CHAPTER 2 : ENVIRONMENTAL ANALYSIS OF THE AREA

Physical Environment	84
Geology	84
Soils	84 - 85
Climate and Meteorology	85-86-87
Hydrology	87
Biotic Environment	87
Terrestrial Communities	88
Flora and Fauna	88
Disease Vectors	88
Sociocultural Environment	89
Present and future populations	89
Air - atmospheric quality, odors and noise	89 - 90
Public Health and Safety	90 - 91

<b><u>CHAPTER 3 : EXTENDED AERATION ACTIVATED SLUDGE</u></b>	
Complete description of the process	92-93-94
<b><u>CHAPTER 4: PLANT OPERATION DESCRIPTION</u></b>	
Introduction	95
Present situation - Existing method of treatment	
Proposed scheme	96
Mechanical treatment	96
Biological treatment	96 - 97
Tertiary treatment	97
Preffered site	97 - 98
<b><u>CHAPTER 5: PLANT DESIGN PROCEDURE</u></b>	
Basic Wastewater parameters	99 - 100
Equipment Specifications	101
Calculations	102 to 108
<b><u>CHAPTER 6 : ENVIRONMETAL EFFECTS</u></b>	
Introduction	109
Effects from proposed plant	110
<b><u>CHAPTER 7: ENVIRONMENTAL EFFECT'S CONTROL</u></b>	
Introduction	111 - 112
Sludge treatment and disposal	113-114-115
Selected sludge disposal method for the proposed plant	115
<b><u>CHAPTER 8 : CONCLUSIONS</u></b>	116-117-118

REFERENCE

APPENDIX (Maps and Drawings)

## Acknowledgments

The preparation of this project, is the final etape of the three year work in the Higher Technical Institute.

Preparing this diploma work, I had to go through many ways in educating my self to be a good citizen and an engineer. I feel the obligation and pleasure to thank the many people I have come across with and learned from them in either ways :  
My teachers and my friends.

Special thanks to Mrs. Lia Georgiou of the Water Department, Mrs. Evi Theopemptou of the Sewerage Board of Nicosia, Mr. Antonis Hannoullis of the Water Department, and to my professor and supervisor Mr. N. Kathijjotes.

I tried to found the words to show all the gratitude to my mother, that was my gardian angel all these years of hard work. I haven't found anything. Just, "I love you, mama!"
