INTRODUCTION

The Pascal Report Generator Version 1.0

The Pascal Report Generator is the latest tool available for Pascal Programmers and it is a necessity for Pascal report generation programs. It promises to make your lives easier by giving you automation as far as coding programs for report generation is concerned. The friendly GUI environment as well as the useful features provided for report formatting will surprise most of the Pascal programmers who could not believe that Pascal has the capability of doing.

This book explains step by step how to utilize your PRG copy and get the best out of it. It explains messages as well as procedure in order to perform the described tasks and system options.

Contents

	Page No.
Preface	2
Introduction	3
How to use this book	4
