Introduction

The TRNSYS simulation program is an acronym for transient simulation program, is a quasi-steady simulation model. This program was developed by the members of the Solar Energy Laboratory at the University of Wisconsin was released in 1974.

The program consists of many subroutines which represent the various components commonly found in a Solar System, such as the Solar Collector, Heat Exchangers, Straight and fully mixed Water Storage Tanks, space and domestic water heating loads, pumps, auxiliary heaters, thermostats, head pumps, cooling devices, tees, valves e.c.t.

There are also component routines to handle input of weather data or other time-dependent forcing functions and output of simulation result. Many components may operate in any of several models, offering differing degrees of model complexity.

Also, the capabilities of component routines may overlap. Building loads, for example, may be calculated using the simple 'degree-hour' load model or with the more detailed transfer function zone component.

Alternatively, TRNSYS can accept hourly loads generated by other load programs.

About This Book	1
Acknowledgment	2
Introduction.....	3
Chapter 1 Investigation Phase.....	4
1.1 Initial Investigation-Activity 1.....	4
1.1.1 The History of the Solar Simulation Problem.....	4
1.1.2 The solar Simulator Approach-General information.....	4
1.1.2.1 Weather Data Generator.....	4
1.1.2.2 Solar Radiation Processor.....	5
1.1.2.3 Solar Collectors.....	6
1.1.2.4 Pump Controller.....	10
1.1.2.5 Pump.....	11
1.1.2.6 Auxiliary Heater.....	11
1.1.2.7 Load.....	11
1.1.2.8 Storage Tank.....	13
1.1.2.9 Integrator.....	14
1.1.2.10 Economic Analysis.....	14
1.1.2.11 Printer.....	15
1.2 Feasibility Study-Activity 2.....	16
1.2.1 Introduction.....	16
1.2.2 Purpose and scope of the system.....	16
1.2.3 Recommendation.....	16
1.2.4 Feasibility study considerations.....	17
1.2.4.1 Financial feasibility.....	17
1.2.4.1.1 Developmental costs.....	17
1.2.4.1.2 Developmental benefits.....	18
1.2.4.1.3 Operational costs.....	18
1.2.4.1.4 Operational Benefits.....	19
1.2.4.2 Operational feasibility.....	19
1.2.4.3 Technical feasibility.....	20

1.2.4.4 Schedule feasibility.....	20
1.2.4.5 Human factors feasibility.....	21

Chapter 2-Analysis and General Design Phase.....22

Introduction.....	22
2.1 Existing System Review - Activity 3.....	23
Introduction.....	23
2.1.1 Detailed Description of Existing System.....	23
2.1.2 TRNSYS-Economic Analysis Of A Solar Water Heating System.....	23
2.1.2.1 File Insert And Data.....	23
2.1.2.2 Weather Data Generator-Insert Values.....	24
2.1.2.3 Solar Radiation Processor-Insert Values	24
2.1.2.4 Solar Collector-Insert Values	24
2.1.2.5 Pump Controller-Insert Values.....	24
2.1.2.6 Pump-Insert Values	24
2.1.2.7 Auxiliary Heater-Insert Values	24
2.1.2.8 Load-Insert Values.....	24
2.1.2.9 Storage Tank-Insert Values.....	24
2.1.2.10 Fuel Cost Multiplier-Insert Values	25
2.1.2.11 Integrator-Insert Values.....	25
2.1.2.12 Fuel Cost Integrator-Insert Values.....	25
2.1.2.13 Economic Analysis-Insert Values	25
2.1.2.14 Printer-Insert Values.....	25
2.2 New System Requirements-Activity 4.....	26
Introduction.....	26
2.2.1 General Description-Purpose.....	26.
2.3 New System Design Specification Document-Activity 5.....	27
2.3.1 Overview Narratives.....	27
2.3.1.1 System Purpose.....	27
2.3.2 System Functions.....	27
2.3.3 Processing.....	27
2.3.3.1 Condex Diagram.....	27
2.3.3.2 Diagram 0.....	27
2.3.3.3 Level 1.....	27

2.3.3.4 Level 2.....	27
2.3.3.5 Data Flow System Flowcharts	28
2.3.3.6 Normalization	28
2.3.4 Data Dictionary.....	28
2.3.4.1 Data Elements.....	28
2.3.4.2 Data structure	28
2.3.4.3 Process.....	28
2.3.5 Outputs.....	28
2.3.6 Inputs	29
2.3.7 User Interface.....	29
2.3.8 Data Files.....	29
2.3.8.1 Data Stores.....	29
2.3.9 Security and Control.....	29
2.3.9.1 Access Controls.....	30
2.3.9.2 Source Document Control.....	30
2.3.9.3 Data Entry Controls	30
2.3.9.4 Processing Controls.....	30
2.3.9.5 Output Controls.....	30
2.3.9.6 File Controls.....	30
2.3.9.7 Documentation Controls.....	30
2.3.9.8 Organization Controls.....	30
2.3.10 Policy Considerations.....	31
2.3.11 Performance Criteria.....	31
2.3.12 Computer Operation Interface With The New System.....	31
2.3.13 Software Packages.....	31
2.4 Implementation and Installation Planning-Activity 6.....	32
Introduction.....	32
2.4.1 Preliminary Detailed Design and Implementation - Test Plan.....	33
2.4.2 Preliminary System Test Plan.....	34
2.4.3 User Training Outline.....	35
2.4.4 Preliminary Installation Plan.....	35
Chapter 3-Detailed Design and Implementation Phase.....	36
3.1 Technical Design-Activity 7.....	36

3.1.1 Screen Design.....	36
3.1.2 Messages and User Interface.....	36
3.1.3 On Line Help Facility.....	36
3.1.4 Protection.....	37
3.1.5 Security.....	37
3.2 Test Specification and Planning-Activity 8.....	38
Introduction.....	38
3.2.1 Unit Testing.....	38
3.2.2 Integration Testing.....	38
3.2.3 Function Testing.....	38
3.2.4 System Testing.....	38
3.2.5 Acceptance Testing.....	38
3.3 Programing and Testing-Actinity 9.....	40
3.3.1 Project Management.....	40
3.3.2 Code Prodection.....	40
3.3.3 Other Tools Used.....	40
3.4 User Training-Actinity 10.....	41
3.5 System Test-Activity 11.....	42
Chapter 4-Installation Phase.....	43
4.1 File Conversion.....	43
4.2 System Installation.....	43
Chapter 5-Review Phase.....	44
5.1 Development Recap.....	44
5.2 Post Implementation Review.....	44
