

WasteWater Reuse
by
XENIOS CHR. SOFIANOS

Project Report
Submitted to the
Department of Civil Engineering
of the Higher Technical Institute
Nicosia Cyprus
in partial fulfillment of the
requirements for the diploma

of the

TECHNICIAN ENGINEER
IN
CIVIL ENGINEERING

JUNE 1994

ACKNOWLEDGMENTS

I would like to express my sincere appreciation and thanks to supervisor Mr. N. Kathijotes for his valuable help and guidance during the preparation of this project.

I would like also to thank Mr. G. Stylianou of the Institute of Agricultural Research as well as Mr. M. Ilia for their remarkable help.

Finally I am very grateful to Mr. Eftihios Malekkides the Environmental Engineer of the Townplanning and Housing Department for his valuable help.

SUMMARY

Wastewater Reuse.

The objectives of this project were to:

- (1) Investigate the behaviour of different wastewater's elements in the output situation of a lycimeter by the "lycimeter" method.
- (2) Check the influence of the soil on the output samples
- (3) Point the weaknesses of the present project and suggest solution.
