USER

MANUAL

U S E R R E F E R E N C E M A N U A L

1. Introduction

Theatre Reservation System is a computerized way of managing the Reservations of the theatre. Special functions have been developed for this reason in order to improve the spectator's service as far as quality, and accuracy are concerned.

The user will find most of the facilities he needs and he will be able to earn time and to avoid most of the paperwork he had to deal with until now.

Special graphical presentations have been developed in order to give the opportunity to the user to have a more realistic picture of the Theatre and the reserved seats.

The purpose of this Manual is to help the user to understand the main functions of the Theatre Reservation System.

Throughout this book, all the operations that can be carried out during the execution of the system, will be demonstrated.

Remember that this reference manual is designed in such a way, that the user will be able to get familiar with the system, although he may had no previous experience with computers.

The System is mainly separated to three sections :

1. First Section deals with the New Reservations entries.
2. Second Section deals with the management of the current Performances.
3. Third section deals with the provision of some financial information.

I hope you will enjoy first practising, and then working with this system.
