1. Introduction

Real Estate Management System has been designed to make the daily work a Real Estate Office easier by replaced all the manual work into computerized. The system can provide easier methods of doing the Office work. The addition of a new customer is doing computerized through a form. Also the properties that the office offers to its customers are also being added to the system computerized and the employee can find any property very easy since all the properties are collected together in one file. The manager can get statistical reports about the incomes and the expenses of the month. Also he can get through the system other reports about the customers and the properties that sold or are still available for sale. It has a user-friendly environment that is really important for the easy use of any kind of users.

With this system you will not get your personal computer overloaded. The Real Estate Management System resides on a CD-ROM and typical installation will take place to install it.
