## CHAPTER 1

### 1.1 INTRODUCTION

This system Monitors and Controls the Chemical Products that are either imported or are locally produced.

It keeps records of the movement history of the chemical products in Cyprus and also records of the industries that are producing or using chemical products.

Detailed information about the industries also include raw materials they use, finished goods they produce and wastes they emit. You can also enter information in text form for the chemical products and industries.

We think that these few words gave you a general idea of what the system is all about. We now leave you operate the system and discover it by yourself with the help of this manual.

### 1.2 INSTALLATION PROCEDURE
