PAPADOPOULOS ANDREAS

PROJECT REPORT

Submitted to the

Department of Civil Engineering

of the Higher Technical Institute

Nicosia Cyprus

In partial fulfillment of the requirement

For the diploma of

TECHNICIAN ENGINEER

IN

CIVIL ENGINEERING

HIGHER TECHNICAL INSTITUTE	PROJECT NO 3465
----------------------------------	--------------------

SUMMARY

The scope of this project was to prepare the bill of quantities for given building (house), by using the traditional method of measurement and the SMM7.

The taking off of the quantities, as well as the squaring and abstracting and billing, was carried out in such a way that any qualified surveyor can follow up the work from any point without any difficulties.
