ACKNOWLEDGEMENT

Before proceeding to the presentation of our work, we feel like expressing our deepest appreciation to those who have in any way helped the completion of this study.

To them we owe all the knowledge that we have acquired through the execution of this project.

Firstly, we would like to thank our project supervisor DR DESPO SERGHIDES for her willingness to help and her effective guidance and also for the remarkable interest she showed.

Secondly, we would like to thank the owner of the house MR ANDREAS SERGHIDES for all the information and valuable co-operation.

Also we express our thanks to MR GLAVKOS PAPADOURIS AND MRS ATHENA CLERIDES for their inestimable information and guidance regarding the structural condition and the building and town planning laws and regulations relevant to the house.

Finally, our thanks go to CHRISTOS STYLIANOU who has undertaken the task of carrying out all the typing work of this project.

ABSTRACT

This project deals with an old house in Strovolos-Nicosia and it is very close to the Municipal Hall of Strovolos, also is not far away from the centre of the town. Finds itself after nearly a century of life in a quite good condition, however a partial restoration and preservation is demanded.

Consequent steps are to determine the sources of deterioration, to identify all existing failures in the structure of the house and propose Remedies and Measures for Restoration.

Finally, the architectural drawings of the existing building will be given, as well as the drawings of the proposed conversion into a pub.
