## DESIGN OF THE ELECTRICAL INSTALLATION OF AN OFFICE BLOCK

by :

Theodorides Pericles

Project Report submitted to the Department of Electrical Engineering of the Higher Technical Institute Nicosia, Cyprus in partial fulfillment of the requirements for the diploma of TECHNICIAN ENGINEER

in

#### ELECTRICAL ENGINEERING

HIGHER PROJECT NO.

JUNE 1990

#### SUMMARY

This project deals with the design of the electrical installation of an office block consisting of four floors and the ground floor.

First illumination calculations were carried out and then follows the electrical design.

Also the cost of the electrical installation for the building was estimated, including labour.

Finally, the drawing indicating the position of control switches and the arrangements of the final circuits were made as well as the single line diagrams.

CHAPTER 1	: ILLUMINATION DESIGN	
1.1	Introduction	1
1.2	Methods of illumination calculations	1
1.3	Definitions of terms used	2
1.4	Selection of luminaire	7
1.5	Design procedure	7
1.6	Actual design	9

CHAPTER 2	: DESIGN OF THE ELECTRICAL INSTALLATION	
2.1	Introduction	21
2.2	Characteristics of supply	21
2.3	Requirements for lighting and power	
	installation	21
2.4	Assumption to be done for lighting, socket	
	outlets and power installation	22
2.5	Design procedures	22
2.6	Ring circuits for s/o design	26
2.7	Actual design	28
2.7.1	Socket outlet circuit design	28
2.7.2	Lighting circuit design	33
2.7.3	Lighting circuit design of common use areas	36
2.7.4	Tables for lighting and socket outlet	
	circuits served by the various distribution	
	boards	43
2.7.5	Main supply cables and RCCB ratings	45
2.7.6	Balancing of phases	48
2.7.7	Fault level calculations	49
