PREFACE

The " MCACN " is a multimedia educational package which is developed for the partial fulfillment of the award of the Diploma in Computer Studies at Higher Technical Institute.

The aim of this project is to computerize all the procedures that involve the course of Communication Networks subject taught at the second year of Computer Studies and it is made up of the following five modules :

- Dictionary Module
- Encyclopedia Module
- Tests / Exams Module
- Reports Module
- Students' Information Module

This User Manual is a fully explanatory and easy to use guide for all the functions of the " MCACN " system. You can use it as a lesson, to give you hands on practice in learning the program or as a quick reference when you want to find out how to react at hard times. With the use of the Table of Contents, you will be in the position to find what you are looking for in a minimal time. Every module is described in a separate chapter.

It is preferable for each user of this package to have an experience using Macintosh and be familiar with the Apple Operating System.
