

ENVIRONMENTAL IMPACT ASSESSMENT

By

Marinos Nicolaou

Project report submitted to the

Department of Civil Engineering

of the Higher Technical institute

Nicosia-Cyprus

C/1025

In partial fulfillment of the requirements for the diploma of

TECHNICIAN ENGINEER

IN

CIVIL ENGINEERING

HIGHER TECHNICAL INSTITUTE	PROJECT NO
	3686

June 2007

Summary

The national environmental policy act requires environmental impact considerations to be included in project planning along with technical and economic concerns. The action-forcing mechanism is that environmental impact statements must be prepared to describe the environmental consequences of proposed actions and various alternatives. Over 6000 statements have been prepared since the effective date of the act, January 1, 1970, and even more will be prepared in the future.

Contents

Acknowledgements	4
Summary	5
Introduction	6
Chapter 1 Environmental Impact Assessment	7
-Environmental inventory.	7
-Environmental assessment.	8
-National Environmental Policy Act	10
-Major actions significantly affecting the quality of the human environment.	12
Environmental consequences	14
-Noise pollution	14
-Land pollution	14
-Water pollution	15
Chapter 2 Application of Environmental Impact Statement	19
-Environmental impact statement	19
-Basic contents of an impact statement.	19
-Format and content of an EIS.	21
- Required Elements	22

Chapter 3 Coastal Area Management Programme (CAMP)	25
-Coastal Area Management Programme (CAMP), for Cyprus.	25
-Integrated coastal area management (ICAM) methodology.	27
-Sustainability analysis, indicators and environmental Awareness / public participation.	28
-Biodiversity analysis in ICAM.	29
-Carrying capacity assessment.	30
-Strategic environmental assessment.	31
-Environmental economics.	32
Conclusion	33
