ACKNOWLEDGEMENTS

I would like to express my gratefulness to M. John Demetriou, for his valuable help in practical as well as in theoretical requirements of this project.

I would also like to express my thanks to all my friends schoolmates and my parents who helped me in graphics and presentation of this project.

ABSTRACT

This project deals with the suggestion of measures for an optimum maximum demand by load scheduling and estimating the savings in electricity and money from the application of such measures. Also it deals with the analysis of the electricity consumption and electricity auditing.
