# 1.INTRODUCTION

## 1.1 SYSTEM DESCRIPTION

The Paediatrician Computer Information System is a program specially designed to provide an on_line facility for assisting the daily Doctor service in a Paediatrician 's clinic.

The major purpose of the system is to provide an efficient way to manage data related to child, necessary
for the daily work in a clinic like this.

Another, purpose of the system is to keep some accounting and keep doctor's appointments.

Using the system you can display, amend, find, analyze and print any data entered.

The manual assumes that you are familiar with your computer and it's disk Operating System.
