INTRODUCTION

The COMPUTER CONTROL SYSTEM FOR MONITORING THE INVESTMENTS OF INSURANCE COMPANIES is a program to be used by the office of the superintendent of insurance companies, that will help in the work performed.

The system will assist the person responsible for keeping all the information concerning the investments of insurance companies, by providing immediate access to the information kept by the system and producing the reports and statistic tables required effortlessly.

Among others, one can succeed the following:

- Store and extract information about the insurance companies investments.
- Print the reports necessary.

The system is very easy to use, so one does not have to spend a lot of time reading. The manual is divided in sections in such a way, so as to help the reader to be able to locate the option desired quickly and easily. The manual aims to provide the information necessary, that will allow a user to get familiarized with the systems and its options.
