

# PRODUCTION OF A TOPOGRAPHICAL MAP

BY

PAPATHEOCHAROUS SOLON

## Project Report

Submitted to

the Department of Civil Engineering  
of Higher Technical Institute  
Nicosia, Cyprus

In Partial fulfilment of the requirements  
for the diploma of

TECHNICIAN ENGINEER

in

Civil Engineering

June 1995

## ACKNOWLEDGEMENTS

My sincere thanks are owed to the following individuals and organisations:

Mr. Anastasiades Klitos (my supervisor), Senior Lecturer in Civil Engineering of the H.T.I. for the useful guidance and supervision during the whole process of this project.

Mr. Ch. Zinonos, Surveyor in the Surveying Department of Nicosia, for the advice and help that gave us during the project.

Mr. Papatheocharous Theochari (ex-topographer) for giving me advice during my project.

Mr. Zeniou Zenios (fellow-student) who co-operated with me in the field work of this project.

The Lab-assistance of Civil Engineering of the H.T.I.

To all those who in anyway helped in the writing and presenting of this project.

## SUMMARY

The object of this project is to produce a topographical map of an area. The area mapped lies in Monagrrouli village.

A selection of the most suitable stations was made after a reconnaissance survey of the area.

The first step was the triangulation and this was done to give a typical example of triangulation when such a method is necessary to be used for fixing stations.

The second step was to take all the existing features, except buildings by the method of tacheometry.

The following step was the chain surveying in which all existing buildings within the boundaries of the area mapped, were taken.

Then the levelling of the station was followed by considering +100.00m height the level of the station A.

The last step was contouring which was based on the levels found from the levelling procedure of the stations. The method used was the gridding and contour lines were drawn at 1.0m intervals.

The following maps were drawn:

- A. Triangulation
- B. Levelling and Contouring
- C. Details
- d. Final
