

DESIGN AND OPERATING CHARACTERISTICS OF A
PETROL INJECTION SYSTEM

BY

CHRISTOU CHARALAMBOS

Project Report

Submitted to
the Department of Mechanical Engineering
of the Higher Technical Institute
Nicosia - Cyprus
in partial fulfillment of the requirements
for the diploma of

TECHNICIAN ENGINEER

HIGHER TECHNICAL INSTITUTE	PROJECT NO 1677
----------------------------------	--------------------

SUMMARY

The object of this project was to design and describe the operating characteristics at a petrol injection system.

The whole work is divided into two parts. The first part referred to the single point injection system and the second part to the multi-point injection system.

The first part was divided into two chapters. The first chapter deals with general description and system schematic. The second chapter deals with components description. The various parts of the system are described.

The second part was divided into seven chapters. The first chapter deals with engine's fuel supply. Chapter two refers to air intake system. The third chapter deals with adaptation at different operating conditions. The chapter four describes additional functions of the system. Chapter five refers to Electronic Control Unit, chapter six deals with lambda - closed loop control circuit and finally chapter seven refers to troubleshooting of injection system.

CONTENTS

	PAGE
ACKNOWLEDGEMENTS	I
CONTENTS	II
SUMMARY	VI
INTRODUCTION	1
PART I - SINGLE POINT INJECTION	
CHAPTER 1	7
1.1 Features of Single Point Injection ...	7
1.2 The Electronic Control Unit Inputs ...	8
1.3 System Schematic	11
CHAPTER 2	12
2.0 Component Description	12
2.1 Throttle Potentiometer	12
2.2 Idle Speed Stepper Motor	13
2.3 Inlet Air Temperature Sensor	13
2.4 Ambient Air Temperature Sensor	13
2.5 Manifold Heater	13
2.6 Relays	13
2.7 Fuel Pump	14
2.8 Knock Sensor	14
2.9 Crankshaft Sensor	15
2.10 Electronic Control Unit	16
I. Operating Principle	17
II. Adaption to Different Operating Conditions	17

2.10.1 Cold Start	17
2.10.2 Part Load	18
2.10.3 Full Load	18
2.10.4 Acceleration	18
2.10.5 Deceleration	18
2.10.6 Engine Speed Limitations	18
2.11 Lambda Sensor	19
2.12 Fuel Pressure Regulator	19
2.13 Injector	19

PART II - MULTI-POINT INJECTION

INTRODUCTION	21
CHAPTER 1	23
1.1 Fuel Pump	24
1.2 Fuel Filter	25
1.3 Fuel Rail	25
1.4 Pressure Regulator	25
1.5 Pulsation Dumper	27
1.6 Injection Valves	27
CHAPTER 2	31
2.1 Air Intake System	31
2.1.1 Air Flow Sensor	32
2.1.2 Engine Speed Signal	33
2.1.3 Crankshaft Angle	34
2.2 Signal Processing	35
2.2.1 Calculating the injection duration	35

CHAPTER 3	37
3.1 Cold Starting	37
3.1.1 Additional fuel via a cold-start valve	37
(a) Cold-start valve	37
(b) Thermostat Switch	38
3.1.2 Additional Fuel Quantity through Injection Valves	39
3.1.3 Warm-up	40
3.1.4 Idle Speed Increase	40
(a) Auxiliary air device	41
(b) Temperature Sensor	41
3.2 Idle	43
3.2.1 Idle mixture control	43
(a) Rotary idle actuator	44
(b) Throttle valve Switch	45
3.3 Full Load	46
3.3.1 Full load enrichment	46
3.4 Overrun	47
3.5 Acceleration	47
3.6 Engine Speed Limiting	48
CHAPTER 4	49
4.1 Further Controls	49
4.1.1 Intake air temperature	49
(a) Intake temperature sensor ..	50
4.1.2 Battery Voltage Fluctuation	50
4.1.3 Fuel quality variations	51
4.1.4 Control of the fuel pump	51

4.2 Possibilities for expansion	52
4.2.1 Knock control	52
4.2.2 Electronic Accelerator	54
4.2.3 Cylinder cutout	54
4.2.4 Exhaust gas Recirculation	55
CHAPTER 5	56
5.1 Electronic Control Unit	56
5.1.1 Operation	56
5.1.2 Injection Signal	56
5.1.3 Ignition Signal	56
5.1.4 Pump Control	57
5.1.5 Further output stages	57
CHAPTER 6	60
6.1 Lambda Sensor	60
6.2 Operation	60
6.3 Construction	60
6.4 Heated Lambda Oxygen Sensor	61
6.5 Lambda Closed Loop Control Circuit ...	63
CHAPTER 7	64
7.1 Sensor Failure	64
7.2 Starting Failure	65
7.3 Fuel Pressure Checks	66
7.4 More Fuel Line Tests	67
7.5 Poor Performance	67
7.6 Weak Injectors	69
