HIGHER TECHNICAL INSTITUTE	PROJECT NO. 2876
----------------------------------	---------------------

Design of the electrical installation of a block of flats.

Project submitted by Walid Barbour, in part satisfaction of the award of
Diploma of Technical engineering of the Higher Technical Institute.

Project supervisor: Mr. Demetriou.

Type of project:

individual

Group

June 1998

Acknowledgement

I would like to express my thanks to my project supervisor

MR. I Demetriou for his assistance throughout the project period.

Abstract
Symbols and Abbreviations
Introduction

Chapter I:

Illumination design

1.1	Introduction	1
1.2	Terminology used	1
1.3	Typical calculations	4
1.4	tabulated results	13

Chapter II:

Lighting design

2.1	Introduction	15
2.2	Typical calculations	17
2.3	Tabulated results	24

Chapter III:

Power design

3.1	Socket outlet	26
3.2	Typical calculations	27
3.3	Tabulated results	34
3.4	Fixed electrical appliances	35

3.5.A	Cooker circuits.....	35
3.5.B	Results of cooker ccts calculations	39
3.6.A	Air-conditioning	40
3.6.B	Results of Air-conditioning ccts.....	46
3.7.A	Water heaters	47
3.7B	results of water heaters ccts	50

Chapter IV

Central Antenna system

4.1	General.....	51
4.2	Actual design.....	54
4.2.1	Calculation for VHF&UHF signals	55
4.2.2	Calculation of each Splitter output.....	57
4.2.3	Calculation of Splitter input.....	58
4.2.4	Selection of Amplifier unit.....	58
4.2.5	Calculation of the Attenuators.....	58
4.2.6	Checking calculations.....	59
4.2.7	Tabulated results of the signal at every TV points.....	61
4.2.8	Calculation of the output of the Antennas.....	63
4.2.9	Calculation of the gain of each Antenna	63

Chapter V

Earthing system

5.1	General.....	65
5.2	Protection for safety.....	66
5.3	Definitions.....	68

Chapter VI

Supply cables

6.1	Samples calculations.....	71
6.2	Tabulated results.....	77

Chapter VII

Inspection and testing

7.1	General.....	78
7.2	Visual inspection.....	78
7.3	Continuity of ring final circuit conductor.....	79
7.4	Continuity of protective conductors.....	80
7.5	Institution resistance.....	81
7.6	Polarity.....	81

Chapter VIII

Telephone distribution system

8.1	General.....	83
8.2	design of the telephone distribution system.....	83

8.2.A Design of the internal wiring	83
8.2.B procedure followed for planning an internal wiring system.....	84
8.2.C Earthing arrangement.....	84
8.2.D installation of the telephone lines.....	85
8.2.E Initial and maximum demand of telephone points.....	86
8.3 list of connections.....	88

Chapter VIII

Costing	89
Conclusions.....	93
Appendices.....	94

Abstract

This project deals with the electrical and telecommunication services, and the central antenna system of a block of flats. The project work includes specifications and tender drawings as well as typical calculations of the design carried out.

The whole design is made according to the relevant for each system Regulations.
