PROJECT REPORT

Submitted to the

Department of Civil Engineering

Of

Higher Technical Institute

Nicosia Cyprus

In partial fulfillment of the requirement

For the diploma of

TECHNICIAN ENGINEER

IN

CIVIL ENGINEERING

## INTRODUCTION

The purpose of this project was to prepare the bill of quantities for a particular building, by using the traditional method of measurement and the SMM7.

The procedure followed for the taking off quantities as well as the abstracting and the billing, was carried out in such a way that any qualified surveyor can follow up the work from any point of the project.

The house is situated at Xylophagou in Larnaca. It's a house that comprises a dining room, a kitchen, a sitting room, three bedrooms and two bathrooms.

## TABLE OF CONTENTS
