

HYDROLOGICAL MEASUREMENTS

by

Maria Panayiotou

Project Report

submitted to

the department of Civil Engineering

of the Higher Technical Institute

Nicosia, Cyprus

in partial fulfillment of the requirements

for the diploma of

TECHNICIAN ENGINEER

in

CIVIL ENGINEERING

June 1994

HIGHER TECHNICAL INSTITUTE	PROJECT NO 2214
----------------------------------	--------------------

ACKNOWLEDGMENTS

I would like to express my sincere appreciation and thanks to supervisor, Mr.N.Kathijotes, for his valuable help during the preparation of this project.

Further I would like to thank Mr.K.Piyiotis Meteorological Officer, of the Meteorological Services and Mr.Metochis of Agricultural research Institute for there remarkable help and advice.

Finally, I am very grateful to my sister Anthi who has kindly undertaken the typing of the present report, my brother Aggelos who has prepare the graphs of this report and all the others who have help me with the project.

HYDROLOGICAL MEASUREMENTS

by Maria Panayiotou

The purpose of this project was:

1. To prepare a lysimeter for operation by achieving a balance between input and output.
2. To maintain the operation of a lysimeter for the period of the project work.
3. To record and comment on the results obtained from the operation of the lysimeter.

C O N T E N T S

	<u>Page</u>
INTRODUCTION	1
<u>CHAPTER 1: LYSIMETRY</u>	4
1.1: Definition	5
1.2: General concept	5
1.3: History of lysimeter	7
1.4: Classification of lysimeter	8
1.4.1: Non-weighing lysimeters	8
1.4.2: Weighing lysimeters	9
1.5: The application of lysimeters	12
<u>CHAPTER 2: EVAPOTRANSPIRATION</u>	13
2.1: Definition	14
2.2: Evaporation	14
2.3: Transpiration	15
2.4: Factors affecting evapotranspiration	16
2.4.1: Wind	17
2.4.2: Temperature	18
2.4.3: Humidity	18
2.4.4: Radiation	19
2.4.5: Precipitation	19
<u>CHAPTER 3: EXPERIMENT OF EVAPOTRANSPIRATION</u>	21
3.1: The H.T.I. lysimetric station	22
3.2: Methodology of the experiment	28

3.3: Meteorological data	32
3.4: Results of the experiment	40
3.4.1: Example of calculations of the meteorological data	41
3.4.2: Calculation of evapotranspiration	43
3.4.3: Table	47
3.4.4: Graphs , Bar chart	48
3.5: Comments on the experiment	56
<u>CONCLUSIONS</u>	60
<u>APPENDIX</u>	62
