ACKNOWLEDGEMENTS

First of all I would like to thank my supervisor Mr. Panikos Masouras for his contribution and guidance during the project development. Mr. Masouras gave me the most important part of the project, his help and guidance. Without him I couldent accomplish my project.

Also I would like to thank all my lecturers for all they gave as all those 3 years in Higher Technical Institute.

Last but not least I would like to thank my parents for their support, all the good and bad times we have past together during the development of this project and during my studies in HTI.

I wish you all the best.

1. INVESTIGATION PHASE

INTRODUCTION

The organization which I chose to analyze and implement its web page is the Girl Guides association of Cyprus. This association is a non governmental and not-for-profit organization. This organization has 4000 members all over Cyprus. Its income arises from the events it organizes, from the membership fees, governmental allowances and allowances from the Cyprus Youth Organization.

The organization has two employees. One of them is the administrator and the other one is the Managing Director. Those employees are the only members which are getting paid from the organization.

There are many people who don't know about the organization's existence and that's a reason why a website will help to inform people about its activities.

Also there are a lot of members which are far away from Cyprus, who want to be updated for any activities the organization organizes.

Due to these reasons I decided to design and implement a web page which will be used for keeping these information. These will be a very useful solution for the members and for everyone uses the internet which nowadays is a very popular way to get any information they need.
