HIGHER TECHNICAL INSTITUTE | PROJECT NO. 3052

Summary

The Cyprus University Sports Federation Promotional System is a project developed and submitted in partial fulfillment for the award of the Higher Technical Institute diploma in the field of Computer Studies.

The project's main objective is to develop a computerized system for the Cyprus University Sports Federation in order to carry out all the operations of the federation successfully. The system will maintain a database on members, and current and upcoming sports events. In addition to this, the system will offer an opportunity to all people interested in sports events, to be informed for all details of championships carried out at a specific period, from the CUSF's Web Page.

As concerning the Internet side of the project, those who wish to view all the details regarding the sports events will be able to do this by entering into the CUSF's Web Page.

As concerning the database side of the project, the system will include members, athletes, sports, referees maintenance as well as other facilities like different reports, enquiries and utilities.

Finally, the system will provide an on-line help facility that will be available for the users either at specific parts, or under a special help option of the system.
