## 1. INTRODUCTION

---

The Cardiologist Computer Information System operates in a user friendly environment and also offers the user extra features for security and presentability. It offers many useful utilities that are easy to use and save time, as well.

Using the system is very simple. Even if you do not have any previous experience with computers, you can easily learn the keyboard before you start using the computer.

You must also refer to this manual every time you have some difficulty regarding the operation of the system. Everything about the operations of the system is explained in this guide. Also refer to the messages that will be appeared when something goes wrong.
