6.2	<u>Supplier Order</u>	37
6.3.	<u>Supplier Invoices</u>	38
7.	<u>Utilities</u>	39
7.1.	<u>Backup and Restore</u>	39

Introduction

Welcome

Welcome to the “Factory Information System”. This system includes many features that cover all the operations performed by a medium – size factory such as sales, orders and accounting. All these features provided are described one – by – one on this manual.

HOW TO USE THIS MANUAL

To make the text easier to understand, this manual adopts several style conversions. This manual presents a variety of examples, tutorials how to use the system, and step – by step guidance for performing the basic functions / transactions of the system.

Several type and font conventions are used in this manual to help make reading it easier:

- *Italic type* is used to explain any example that concerns the use of the system.
- References to appendices and other chapters will be in bold type.

Pictures are also provided for making the examples easier to understand.
