HIGHER TECHNICAL INSTITUTE	PROJECT NO.  3109
----------------------------------	-------------------------

## **Summary**

As it was stated in the introduction the main objective of this project is to help people with their finance. The purpose of this project was to build a system able to provide facilities to the user in order to make his/her life easier in respect of cash management.

For this a purpose a computerized system has been developed utilizing existing information on procedures and information gathered by interviewing people related to this.

Based on the exact project requirements a computer system has been designed and developed to automate the manual way of keeping in track peoples transactions.

The new system utilizes the daily transactions in electronic form. The output reports ware based on the user requirements and how they will help his to make important decisions.

The system provides on-line help , basic system securities and Maintenance Procedures.
