DIPLOMA PROJECT

CENTRAL ANTENNA SYSTEM

by

GEORGE RODOSTRINOUS

JUN 1968

CENTRAL ANTENNA SYSTEM

BY

GEORGE RODOSTHENOUS

Project Report : Submitted to the Electrical Engineering Department
of H.T.I., Nicosia, Cyprus in partial fulfillment of
the requirements for the diploma of
**TECHNICIAN ENGINEER IN ELECTRICAL
ENGINEERING**

Project Supervisor : Mr. D. Lambrianides
Lecturer in Electrical Engineer Department
at H.T.I.

Type of project : Individual

1997

HIGHER TECHNICAL INSTITUTE	PROJECT NO 2684
----------------------------------	--------------------

Acknowledgments

I would like to express my warmest thanks to my supervisor Mr. D. Lambrianides lecturer in the Electrical Engineering Department of H.T.I. for his continues quittance and help throughout the completment of this project.

I would like also to express my sincere thanks to Mr. C. Constantinou for his help and advises in fullfilling this project

CONTENTS

	<u>Page</u>
<u>Central antenna systems introduction</u>	1-2
 <u>Part 1 : Satellite antenna system</u>	
 <u>Chapter 1 : Satellites and satellite orbits</u>	
Satellites.....	3 - 4
Geostationary orbits.....	5
Frequencies.....	6
Microwave Bands.....	7
Path Losses.....	8
 <u>Chapter 2 : Satellite antennas</u>	
Satellite antennas.....	9 - 11
Antenna gain.....	12
Beamwidth.....	13
Dish efficiency.....	14
Dish noise temperature.....	14
Noise.....	15
 <u>Chapter 3 : Satellite dish components</u>	
The LNB.....	16 - 17
LNB noise temperature.....	18
Polarises.....	19
Polarisation.....	19
Waveguide.....	20
Feedhorns.....	21
OMT.....	22 - 23
Actuators.....	23 - 25
Satellite receivers.....	26
Satellite positioner.....	27

Chapter 4 : Istallation

Introduction.....	28
Azimuth angle.....	28 - 29
Lattitude.....	29
Longitude.....	29 - 30
Elevation angle.....	31
Using a satellite to find True South.....	32 - 33
Dowlink overview.....	33 - 34
Installing of the antenna.....	35
Assembling of the dish.....	35 - 36
Aligning the satellite on the geostationary orbit.....	36
Polar mount angles.....	37 - 38

Part 2 : UHF and VHF aerials

Chapter 1 : UHF and VHF aerials

UHF and VHF aerials.....	39 - 40
Bandwidth.....	41
Gain.....	41 - 42
Height gain.....	42
Frequency response.....	42 - 43
Polarization.....	43
Installation of the aerials.....	44

Part 3 : Distribution Network

Chapter 1 : Distribution & components

Distibution of the signal.....	45
Splitters.....	46
Tap-off units.....	47
Amplifier.....	48
Calculations of the amplifiers values.....	49 - 51
SWR.....	52 - 53
Impedance matching.....	54
Coaxial cable.....	55 - 56

Chapter 2 : Design procedure

Design procedure.....57 - 59
Installation requirements..... 59
Cautions..... 59

Chapter 3 : Experimet

Chapter 4 : Calculations
