INTRODUCTION

As far as we go, the cost of leaving a normal life is getting more and more expensive. So people are enforced to work a lot of time and more over to do more than one job in order to cover their needs. Not only is it more convenient for most people on a busy schedule, but the savings in time and gasoline from driving around town makes it hard to pass up. Using the internet puts vast amounts of information at your fingertips. But now with the help of the internet some things which require a lot of time, now can be done faster than before.

The online web_based system will be very user-friendly so users will access it and find their products easily and faster just by a couple of clicks.

ABOUT THE MANUAL

The manual explains thought images how to setup the program that will be used including the entire components needed. -> (WampServer5).

Also there is fully description of all the procedures and functions of the system, including the back-end menu of the Administrator.
