HIGHER TECHNICAL INSTITUTE	PROJECT NO 1604
----------------------------------	--------------------

SUMMARY

HYDROLOGICAL MEASUREMENTS

by Paola Papaphilippou

The purpose of this project was to:

1. Study lysimetry in general.
2. Study meteorological equipment relevant to the project.
3. Propose a lysimetric station appropriate for Cyprus weather conditions and make an evaluation of the expected results of the hydrological measurements.

CONTENTS

	<u>PAGE</u>
INTRODUCTION	1
<u>CHAPTER 1:</u> LYSIMETRY	4
1.1: Definition	5
1.2: Classification of lysimeters	7
1.3: Monolith versus filled-in lysimeters	13
1.4: Free drainage versus suction controlled drainage lysimeters	16
1.5: The application of lysimeters	18
<u>CHAPTER 2:</u> EQUIPMENT EMITTED IN THE PROJECT	19
2.1: Raingauges	20
2.2: Thermohydrographs	28
2.3: Soil thermometers	33
2.4: Weathercock and windmeter	37
2.5: Standard evaporation pan	41
<u>CHAPTER 3:</u> PROPOSED LYSIMETRIC STATION	45
3.1: Operation	46
3.1.1: Evapotranspiration	46
3.1.2: Wastewater	48
3.2: Construction	52
3.2.1: Description	55
3.2.2: Operation Points	58
3.3: Results - Calculations	59
3.3.1: Evapotranspiration	59
3.3.2: Wastewater	62
