HIGHER TECHNICAL INSTITUDE COURSE IN COMPUTER STUDIES

DIPLOMA PROJECT

MULTIMEDIA TRAINING PACKAGE FOR DATABASE MANGEMENT SYSTEMS CS / 218

EVANGELOU CONSTANTINOS 9 JUNE 1999

Inroduction

The purpose of the project is to investigate the material taught in the DBMS course at HTI and identify the main areas that could be studied through the package. Also any other areas significant to be handled, which relate to Relational DBMS must be identified. This was covered in the Investigation Phase.

A computerised multimedia/graphical training package must be developed which will include in it the following major activities:

 Select specific areas of the course and other areas relating to RDBMS and build around these principles the whole system.
 Some of these areas are the following:

Type of DBMS Relational Principles and Approach (Relations, Relationships, Degree of Relationships, etc)

Building ERD

Relations and converting ERD to Relations

Relational Operators

SQL language etc

2. Create for every one of the items listed above a teaching module. The teaching module will include textual, multimedia and graphical demonstrations. Other teaching methods may be used as considered most appropriate for the problem.

- 3. Create a training/tutorial module for every on of the items listed above. Through this module the user will be able to practice interactively on the principles presented.
- 4. Create an examination module for every one of the items listed above. The examination module must test the knowledge acquired by the user of the system in a flexible and random way. Three types of questions must be provided at least. The questions must at least be multiple choice questions, true or false questions and filling the blanks questions which will be saved in a questions data bank.
- 5. Prepare all necessary reports and present on the screen, printer or file.
- 6. Provide online enquiries for any relevant information.
- 7. Derive statistics from the data kept by the system especially in the area of the examination of students Prepare a project report.
- 8. Prepare a report for the system developed.
- 9. Prepare a user manual for the system

Table Of Contents

Introduction	
1. Initial Investigation	1
1.1 Initial Investigation Report	1
1.1.1 Introduction	<u> </u>
1.1.2 Considerations	<u> </u>
1.1.3 Information about the organisation	3
1.1.4 Existing procedures	4
1.1.5 Consider Alternatives	5
1.1.6 Recommendation	6
1.1.7 Following a technique	7
1.1.8 Selection Of Language	8
1.2 Feasibility Study	12
1.2.1 Recommendation	12 12
1.2.2 Financial Feasibility	12
1.2.3 Technical Feasibility	13
1.2.4 Human Factors	15 15
1.2.5Operational Feasibility	
1.2.6 Scheduled Feasibility	15
1.2.7 Conclusion	15
2. Analysis and general design	17
2.1 Introduction	17
2.1.2 Existing Procedure Drawbacks	17 18
2.1.3 Introduction to DBMS	
2.1.4 Visual Basic 6 Characteristics	19
2.2 New System Requirements	23
2.2.2 User specification Report	23
2.2.2.1 Introduction	23
2.2.2.2 Overview Narrative	23
2.2.2.3 System Functions	24
2.2.2.4 Processing	24
2.2.2.5 Data Dictionary	26
2.2.2.6 Inputs to the system	27
2.2.2.7 Outputs to the User	28
2.3 New system Design	30
2.3.1 Introduction	30
2.3.2 New System design specification	30
2.3.2.1 Data File	30
2.3.2.2 User Interface with program	31
2.3.2.3 Performance Criteria	32
2321 Security	33

2.3.2.5 Access Control	33
2.4 Implementation and Installation Planning	34
2.4.1 Introduction	34
2.4.2 Preliminary Implementation phase and test Plan	34
2.4.3 Preliminary System test Plan	<u>35</u>
2.4.4 User Training	35
2.4.5 Preliminary installation plan	36
3. Detailed design and Implementation phase	37
3.1 Technical Design	37
3.1.1 Introduction	37
3.1.2 Detailed Design and Specification Document	37
3.1.2.1 Application Design	37
3.1.2.2 Backup requirements	38
3.1.2.3 File Design	38
3.1.2.4 Security and Control Measures	38
3.2 Test Specification and Planning	39
3.2.1 Introduction	39
3.2.2 Unit testing	40
3.2.3 Integration testing	40
3.2.4 Function testing	41
3.2.5 System testing	41
3.2.6 Acceptance testing	42
3.3 Programming and Testing	43
3.3.1 Introduction	43
3.4 User Training	44
3.4.1 Introduction	44
3.5 System test	45
3.5.1 Introduction	45
4. Review phase	46
4.1 Introduction	46
4.2 Development recap	46
4.3 Post – implementation review	46
