TABLE OF CONTENTS

Introduction

Recipes system is a website that can be used by anyone who is interested in recipes and cooking. This website provides the users with different dishes of their choice. A simple user can register and become a member. A member has more permissions to the site than the simple user can. A member is able to add his own recipes into the database so everyone can see it. The website is split into frames. This is the general description of the website. For further information you may just proceed forward.
