DRAINAGE AND WASTE DISPOSAL SYSTEMS FOR BUILDINGS

Project Report Submitted by

ANDROULLA PIERI

In part satisfaction of the award of diploma of Technician Engineer in civil engineering of the Higher Technical Institute, Cyprus,

Project supervisor: P. Vassiliou
Lecturer in Civil
Engineering, H.T.I.

Type of project: Individual
Group

A B S T R A C T

The project deals with the drainage and waste disposal systems on buildings.

The objectives of the project were the following:

1. To report on the waste water treatment.
2. To discuss the hydraulics of sewers.
3. To discuss the design of a sewerage system.
4. To report on the rainfall and solid wastes.

CONTENTS

	<u>Page</u>
ACKNOWLEDGEMENTS	1
CONTENTS	2-5
ABSTRACT	6
INTRODUCTION TO THE SUBJECT MATTER	7
<u>CHAPTER 1</u>	
Introduction	
1.1. Types of sewage	8
1.2. Sewage characteristics	8
1.3. Importance of water and sewage	9
1.4. Types of collection systems	10-11
<u>CHAPTER 2</u>	
<u>WASTE WATER TREATMENT</u>	
2.1. The need of sewage treatment	12
2.2. Elements of sewage system	13
2.3. Requirements of sewage systems	13
2.4. Test made on sewage	13-14
2.5. Outline of sewage treatment work	15
2.6. Preliminary treatment	16
2.7. Primary treatment	16
2.8. Secondary treatment	17

CHAPTER 3

HYDRAULICS OF SEWERS

3.	Introduction	18
3.1.	Definition of a fluid	18
3.2.	Fundamentals of fluid flow	18
3.3.	Fluid flow	19
3.4.	Factors affecting flow	20
3.5.	Equations governing flow	20-25
3.6.	Pipes flowing full	25
3.7.	Frictional head loss	25
3.8.	Minor head loss	26

CHAPTER 4

SEWER CONSTRUCTION

4.	Introduction	27
4.1.	Trenching	27
4.2.	Foundations	28
4.3.	Removing water	28
4.4.	Placing the pipe	28
4.5.	Provisions for house connections	29
4.6.	Backfilling	29
4.7.	Loads due to earth overburden	30-33
4.8.	Internal water load	33
4.9.	Loads superimposed by vehicle wheels	33-34
4.10.	Excavations of frenches for pipe sewers	34-36
4.11.	Loads on pipes in frenches	36-39

DESIGN OF SEWAGE SYSTEMS

5.1.	Layout of sewerage system	40-41
5.2.	Estimating flows and choosing pipe sizes	41
5.3.	Flows of foul sewage	42
5.4.	Position of sewer in street	42
5.5.	Structural aspects of buried pipes	43-45
5.6.	Matching pipe strength to imposed loads	45-47
5.7.	Asbestos - cement pipe	47
5.8.	Appurtenances for sewers	48-51

CHAPTER 6

RAINFALL

6.1.	Introduction	52
6.2.	Rainfall variations	53
6.3.	Rain making	54
6.4.	Runoff	55
6.5.	Rational method of computing runoff	55-57
6.6.	Storm rainfall	58

CHAPTER 7

SOLID WASTE

7.1.	Introduction	59
7.2.	Factors that affect generation rates	60
7.3.	On - site handling	61
7.4.	On - site storage	62
7.5.	Collection services	63
7.6.	Collection routes	64
7.7.	Transfer stations	65

DRAINAGE AND WASTE DISPOSAL OF A BUILDING

9.	Introduction	67
9.1.	Sewarage system of a building	69
9.2.	Tranference of sewage and waste disposal	70
