

DESIGN OF A WARE HOUSE
IN STEEL

by

PAVLIDES PANTELIS

Project Report
Submitted to
the Department of Civil Engineering
of the Higher Technical Institute
Nicosia Cyprus

in partial fulfillment of the requirements
for the diploma of
TECHNICIAN ENGINEER

in

CIVIL ENGINEERING

June 1994

ACKNOWLEDGEMENTS

I would like to express my personal thanks to my project supervisor Mr. M. Poullaides for his valuable help during the project period.

My personal thanks are extended to Mr. George Christoforou that kindly helped during the design of truss.

Also I would like to thank Maria Joseph and Stella Heracleous for their patience to carry out this project.

Finally my thanks are extended to the following group of friend, for their great support during the project period

Constantinides Gregoris

Nikita Marios

Alexandrou Andreas

Katsaris Panicos

SUMMARY

The object of this project is :

- (1) To make a research on the steel section available in the Cyprus market.
- (2) To design and detail a warehouse in steel
- (3) To estimate the cost of the structural frame.
