COMPUTER SYSTEM FOR THE CYPRUS RALLY

1. INTRODUCTION

This System is specially made for the needs of the Cyprus Rally Procedures. The System gives the chance to utilize the abilities of the Computer as well as the other peripherals (Terminal, Printer e.t.c.) which may be considered as necessary tools for the yearly needs of the Cyprus Rally Procedures.

* How To Use The Program

The System is a menu-driven system and thus it is easy to be used. The only thing you have to do is to switch on the Computer and make the necessary selections of the menu options presented on screen.

The System main features, accessed through the available menu options, are:

(1) **Maintenance** : Through Maintenance, Creation, Modification, Deletion, and Finding of the main system Data File (Personnel, Control Points, Supplies, and Service records) is provided.

(2) **On-Line Enquiries** : On-Line Enquiries on the system data files allows the user to enquire on specific system data file records or fields of records, under certain conditions, and promptly obtain a piece of Information on screen.

(3) **Reports** : This Option allows the user to produce in a hard copy, information concerning the system data files.

(4) **Utilities** : The system provides the following utilities to the user. Among them are :

- (a) File Reorganization.
- (b) Format Diskettes.
- (c) Backup system data files.
- (d) Virus Detection.

If any problems are faced or any doubts are presented throughout System sessions, refer to **USER MANUAL**.

* How To Use The Manual

The **USER MANUAL**, the user guide throughout System Sessions easy to be used, so you don't need to spend much time to understand it. This manual is specially made to be used as a base for information and suggestions as well. It will actual be a great guide/driver for the users needs or possible problems.

If you impatient to RUN the System, then turn page to:

* The Preparation for the System Installation on your Hard Disk.

* The Get Start to begin your adventure in the system.
