

HIGHER TECHNICAL INSTITUTE

CIVIL ENGINEERING DEPARTMENT

DIPLOMA PROJECT

**THE ENERGY ABSORPTION OF GLASS FIBRE REINFORCED
CEMENT AND CONCRETE**

C/ 896

**BY: CHARILAOU ELENI
KYNIGOU ANNA**

JUNE 2000

HIGHER TECHNICAL INSTITUTE	PROJECT NO. 3060
----------------------------------	----------------------------

INDEX

CHAPTER 1:

Introduction

CHAPTER 2:

General survey

2.1 A general survey about fibres

2.1.1 Introduction

2.2 Materials used for fibre reinforcement

2.2.1 Introduction

2.3 Types of fibres used as reinforcement to cementitious matrices

2.3.1 Asbestos fibres

2.3.2 Glass fibres

2.3.3 Synthetic fibres (polymers)

2.3.3.1 Low modulus

2.3.3.2 High modulus

2.3.4 Steel fibres

2.3.5 Natural fibres

CHAPTER 3 :

Past investigations

3.1 Survey on past investigations

3.1.1 Introduction

3.2 Buckround

3.2.1 General survey about Glass fibres

3.2.2 A general survey about GRC

3.2.2.1 Production processes

3.2.2.2 Curing

3.2.2.3 Workability

3.2.2.4 Fibre content in the fresh mix

3.2.2.5 Plastic shrinkage and cracking

3.2.2.6 Static testing of tensile and flexural properties

3.2.2.7 Compaction

3.2.2.8 Fire resistance

3.2.2.9 Dimensional changes

3.2.2.10 Design and application conciderations

CHAPTER 4 :

Experiments

- 4.1 Introduction
- 4.2 Drying the aggregates
- 4.3 Sieving
 - 4.3.1 Procedure
- 4.4 Mix design
 - 4.4.1 Introduction to the parts of concrete mix
 - 4.4.2 Concrete
 - 4.4.3 Compressive strength
 - 4.4.4 Determination of the mix design
 - 4.4.5 Information about concrete
- 4.5 Casting and curing of plain concrete test cubes
 - 4.5.1 Introduction
 - 4.5.2 Casting
 - 4.5.3 Curing
 - 4.5.4 Results
 - 4.5.5 Comments
- 4.6 Casting and curing of plain concrete beams
 - 4.6.1 Introduction
 - 4.6.2 Casting
 - 4.6.3 Curing
 - 4.6.4 Results
- 4.7 Casting and curing of Glass fibre reinforced cement beams
 - 4.7.1 Introduction
 - 4.7.2 Mixing of 3% fibre content
 - 4.7.2.1 Casting
 - 4.7.2.2 Curing
 - 4.7.3 Mixing of 1.5% fibre content
 - 4.7.3.1 Casting
 - 4.7.3.2 Curing
 - 4.7.3.3 Results
 - 4.7.4 Mixing of 1% fibre content
 - 4.7.4.1 Casting
 - 4.7.4.2 Curing
 - 4.7.4.3 Results

CHAPTER 5 :

Comments

REFERENCES

ACKNOWLEDGEMENTS

The work described in this diploma project has been carried out in the Department of Civil Engineering and Structures of Higher Technical Institute under the supervision of Dr.H.Stavrides.

The writers wish to thank Dr.H.Stavrides for his help and guidance as well as Mr.P.Pelekanos for his patience and excellent supervision in laboratories, Ms. C.Demetriou as well as Ms.S.Saman for their patience in preparing the typing of this project.

Many thanks are also due to all of our friends and family for their support and continuous encouragement, since without their help this work would not be possible.

We Thank You All.
