HIGHER TECHNICAL INSTITUTE	PROJECT NO. 2836
----------------------------------	---------------------

INTRODUCTION - ACKNOWLEDGEMENTS

Bill of quantities is the menus whereby the majority of building work is described and measured, it sets out the various items of work in recognized manner and in logical sequence.

One of the methods used for preparing the bill of quantities is by using computers.

This is the method used for this project.

So by taking this chance I would like to express my sincere appreciation to Mr. A. Kkolos, Civil Engineering, senior lecturer of H.T.I., my Project Supervisor, for his friendly help and advice before and after the selection of my project.

Likewise, my special thanks to Mr. S. Andreou Quantity Surveyor, manager of MDA (Cyprus) Ltd, for the personal interest and assistance he showed for the execution of the project.

Lastly, but not least, I would like to express my warm thanks to CHAPO LTD for the provision of the project's drawings and specifications, and especially Mr. John Ioannides, Civil Engineer, for this assistance in the completion of this project.

CONTENTS

1. Bill of Quantities in general
2. Methods of Taking off
3. Methods of preparing of Bill of Quantities
4. Use of computers in Quantity Surveying
5. Taking off
6. Abstracting
7. Bill of Quantities
8. Conclusions
9. Drawings
