1. **INTRODUCTION**

The On-Line Store System will allow the users to shop anything they want from the convenience of their homes. In that way they won't have to leave their premises for shopping, making that simple but time consuming task, just a click away.

The system will operate on Windows 98 / 2000 / ME / XP.

The system is designed having in mind the user's convenience. All the procedures are simple enough for the user to understand under a friendly graphical environment. We also took into consideration, to create a help section, just in case things get a little cloudy!
