

HIGHER TECHNICAL INSTITUTE
COURSE IN COMPUTER STUDIES

DIPLOMA PROJECT

A SYSTEM FOR HTI CENTRAL ACADEMIC
COUNCIL AND ITS SUBCOMMITTEES

CS/367

NICOLAS ANDREOU

JUNE 2006

Introduction

I choose as my final project, to develop a computerized system for the Higher Technical Institute and specific for its Central Academic Council which is the highest academic body of it and also for its subcommittees. The major subcommittees of the Central Academic Council are the Disciplinary Committee, the Admissions Committee and the Scholarships-Prices Committee.

The main objective of the project is to help the members of the Central Academic Council and its subcommittees to manage the minutes taken during their meetings and also give the ability to users get the information needed easily and quickly. The system will help to keep a history for the members of the committees and also the minutes will be stored in backup database for security reason. Another responsibility of the system is to automatically reminder the user for some tasks that are pending and also help him to accomplish some tasks with some automations that the system will has. Further more the system will give the ability to the super user of the system to publish the minutes or anything else information on the web.

The duration of this project is around four months and during this period I will try to understand and implement the user's expectations. My goal is to implement a system that will help the users to complete easily some routine tasks in a user friendly interface.

TABLE OF CONTENTS

Introduction.....	5
1 Investigation Phase	6
1.1 Initial Investigation Phase.....	6
1.1.1 Problem Definition.....	6
1.1.2 Existing procedures.....	6
1.1.3 Information about the Institute.....	6
1.1.3.1 Goals of the Institute.....	7
1.1.3.2 Organizational Structure	7
1.1.3.3 Policies.....	7
1.1.4 Information about people.....	8
1.1.4.1 Job Duties.....	8
1.1.5 Information about the work.....	8
1.1.5.1 Tasks and work flows	8
1.1.5.2 Inputs.....	8
1.1.5.3 Outputs.....	9
1.1.5.4 Work schedules and volumes.....	9
1.1.5.5 Performance Criteria.....	9
1.1.5.6 Control Mechanism.....	9
1.1.6 Information about work environment	10
1.1.6.1 Physical movement of documents.....	10
1.1.6.2 Resources Available.....	10
1.1.7 Conclusion	10
1.2 FEASIBILITY STUDY	11
1.2.1 Introduction.....	11
1.2.2 Recommended Solutions	11
1.2.3 Financial Feasibility.....	12
1.2.4 Operational Feasibility.....	13
1.2.5 Technical Feasibility	13
1.2.6 Schedule Feasibility	13
1.2.7 Human Factors	13
1.2.8 Clear-cut Suggestion.....	14
1.2.9 Conclusion	14
2 Analysis and General Design Phase	15
2.1 Existing System Review	15
2.2 New System Requirements	15
2.2.1 Overview Narrative.....	15
2.2.2 Processing	15
2.2.2.1 Context Diagram	15
2.2.2.2 Data Flow Diagram 0.....	15
2.2.2.3 Entity Relational Diagram	16
2.2.3 Data Dictionary	16
2.2.4 Process Descriptions	16
2.2.5 Security and Control	17
2.2.5.1 User Authentication	17
3 Detailed Design and implementation phase.....	18
3.1 Technical Design.....	18
4 Review Phase	18
4.1 Introduction.....	18
4.2 Development Recap	18
4.3 Conclusion	18
APPENDICES	19
Appendix A – Project Specifications.....	20

APPENDIX B - Organizational Structures.....	21
Appendix B-1 Organizational Structure of the H.T.I.....	22
Appendix B-2 Organizational Structure of the CAC.....	23
APPENDIX C - Policies of the CAC.....	24
Appendix C-1 Rules of the CAC.....	25
APPENDIX D – Input/Output.....	27
Appendix D-1 Announcement /Agenda of the meeting.....	28
Appendix D-2 Presences, Minutes, Appendixes of the meeting.....	29
APPENDIX E - Processing.....	30
Appendix E1-Context Diagram.....	31
Appendix E2 – DFD 0.....	32
Appendix E3-Entity Relational Diagram.....	33
APPENDIX F – Data Dictionary.....	34
Appendix F1 – Data Structures.....	35
Appendix F2 – Normalized Data Stores.....	61
Appendix F3 – Process Descriptions.....	72
